

CONGRESS OF THE
INTERNATIONAL PEDIATRIC SLEEP ASSOCIATION
JOINT MEETING WITH
PEDIATRIC SLEEP MEDICINE CONFERENCE
ROME 3RD -5TH DECEMBER 2010

Welcome

On behalf of the executive committee it is our pleasure to invite you to attend the congress of the International Pediatric Sleep Association, *joint meeting with* Pediatric Sleep Medicine Conference to be held in Rome 3-5 December 2010.

We are delighted to have a host of world-renowned International speakers joining this meeting. This is a unique opportunity to meet colleagues and industry involved in the practice of Sleep Medicine. Assembling the two conferences of the IPSA and the Pediatric Sleep Congress will mark the integration of different experienced researchers all over the world and will provide a special opportunity to share knowledge in sleep medicine and research during development.

The academic aspects of the congress will include updates, education, research and presentations from opinion leaders in the field of Pediatric Sleep Medicine and will highlight the recent significant advances in both basic science and clinical sleep medicine during development.

The location of the congress at Hotel Nazionale Sala Capranica offers a unique experience inside the historical part of Rome really in the city center of Rome with the most important monuments (like Coliseum, Pantheon, Fontana di Trevi, Piazza Navona, etc.) at a short walking distance. The on-site social programme promises to keep you entertained and sustained.

CONGRESS Main Topics:

Arousals and mechanisms of SIDS; Abnormal behaviors/movements during sleep and epilepsy; The sleep deprived and sleepy child; Treatment of pediatric sleep disorders

PRE-CONGRESS PEDIATRIC SLEEP COURSE Topics

Normative data of sleep during development; Application of AASM sleep scoring criteria in children; How to study sleep in children; Arousals and SIDS; Clinical aspects, controversies and consensus in treatment of Pediatric Sleep Disordered Breathing; Insomnia in infants and children; Sleep in adolescence; From parasomnia to epilepsy; The clinical significance of motor activity during sleep ; Sleepiness and narcolepsy; Pharmacologic treatment of sleep disorders in children.
